Fitzgerald Spector Inc has been in business for over 15 years. This Manufacturer's Rep Agency represents specialty electrical products targeted towards OEM, industrial, and commercial markets in Eastern Pennsylvania, Southern New Jersey, Maryland, and Delaware territories.

Thanks to the organization's small size, we are able to take a personal approach to business and sales, priding ourselves on personable interactions, quick response times, and our extensive knowledge of the industry. This hands on approach gives our clients the peace of mind that they have entered into a business relationship with a company on which they can depend upon to find solutions to their ever changing needs.

RectorSeal® Pass-Thru Devices

- Maximum fill capacity - Cables can be bundled.
- No need to lay cables flat in device.
- Pre-firesstopped design allows for use in both walls and floors.
 - Square or round shaped steel sleeves with intumescent material.
 - Brackets are friction attached.
 - Opens for easy installation, retrofit or removal of penetrants.
 - Industry leading "L" rating: 0% - 100% fill.

Certain states have put guidelines in place to reduce energy consumption. In Pennsylvania legislation can be seen in the form of Act 129. This will potentially result in increased penalties from electricity providers. National Meter offers the DH96 CPP Demand Control System to monitor peak demand, giving you the power to decrease your penalties from the electric company. Whether you are working with machinery, or just managing the electricity in an office building, using National Meter's monitoring systems can reduce your electricity demand and increase your productivity.

The World Leader
in Single to Three-Phase Electric Power Conversion

Kay's Phasemaster is the most cost-effective way to operate any 3-phase machine from a 1-phase supply when utility 3-phase is unavailable or too expensive to obtain. Why choose a Phasemaster Rotary Phase Converter? Because Kay Industries offers application experience, technical support, and engineered quality unmatched in the industry.

- We guarantee the workmanship, finish and overall appearance of the Phasemaster and Miniphase will be superior to any other brand on the market or any you have ever seen.
- We guarantee a Phasemaster converter will cost less than any other converter of the same frame size.
- We guarantee a Phasemaster converter will be quieter than any other make of rotary.
- We guarantee a Phasemaster converter will do the job it was purchased to perform and will operate your load at its full rated capacity
- If the Phasemaster converter does not meet these claims, you may exchange it for a different model or return it for full credit.
