

# FITZGERALD SPECTOR INC

Fitzgerald Spector Inc has been in business for over 15 years. This Manufacturers Rep Agency represents specialty electrical products targeted towards OEM, industrial, and commercial markets in Eastern Pennsylvania, Southern New Jersey, Maryland, and Delaware territories.

Thanks to the organization's small size, we are able to take a personal approach to business and sales, priding ourselves on personable interactions, quick response times, and our extensive knowledge of the industry. This hands on approach gives our clients the peace of mind that they have entered into a business relationship with a company on which they can depend upon to find solutions to their ever changing needs.

## Adaptalok Conduit Fittings are Now UL Listed!

A revolutionary, one piece, moulded fitting ideal for wet or dry conditions is now UL listed. Adaptalok ATS offers a simple and failsafe choice of conduit fittings, providing the highest possible performance in a single component. They are fast to fit and easy to remove, with the Adaptalok removal tool, while allowing stockholding to be reduced by offering all required IP standards and specifications in a true one piece fitting. Adaptalok ATS has full range availability in sizes from 5/16+ to 1 1/2+. The fittings come in straight, 90° elbow and 45° elbow formats, with fixed or swivel nylon or metal thread options.

## Allied Moulded's Newest Offering

Allied Moulded now offers fiberglass boxes with decorative finishes.

### Features and Benefits

- o Cost effective decorative finish applied to fiberglass enclosures.
- o Hundreds of standard finishes available be utilized to meet any specific need.
- o Enclosure finishes can be a design or photograph
- o Superior process compared to silk screen the area of cost, durability, high definition, and unlimited colors.
- o This decorative process has been proven to last in outdoor (UV) and high temperature (248 deg F) automotive type applications.

### Available Styles

- wood grains
- hi-tech graphite
- sea shell
- USA flag
- carbon fiber
- brushed metal
- camouflage
- Much Much More!

## Think Dongan For American Made Transformers

Dongan has been manufacturing 1 and 3 phase transformers (up to 150 kVA), buck boost, and low voltage transformers out of their Detroit Michigan and Pioneer Ohio plants for over half of a century. Dongan is known for producing reliable, American made product.

- **Made in the USA – Pioneer, Ohio**
- Quality transformers. in business since 1903
- Competitive pricing
- Quick to go stocking- 2 days from Pioneer, OH
- Specialty Transformers Available!

## NEW from Sprecher + Schuh

### Immediate Notification of Circuit Overloads

Sprecher + Schuh has just introduced their new CEP7-ERID, a Remote Indication Display that works in conjunction with Sprecher's solid state overload relays. An indicator light will immediately notify you of a circuit overload. This will allow you to sit in your office without the constant worry of a tripped circuit.

#### This new accessory includes:

- Remote reset and status indicators
- Compact size allows it to fit in the front of a panel (22mm hole)
- Allows you to identify the reason for fault condition and reset without opening the panel door and having to dawn the OSHA required arc flash suit

### The BEST Communications Module Just got BETTER!

The latest in network communication is now available for our state-of-the-art CEP7 Solid State Overload Relays. Sprecher + Schuh Network Communication Modules for CEP7 relays include the CEP7-EPRB Profibus, and the CEP7-ETN Ethernet side mount modules. Both add on modules offer field installation, simplified controls and a compact size. Streamline your processes with better control, protection, monitoring, and diagnostic capabilities for improved efficiency. Select a communication module to deliver direct access to motor performance and diagnostic data on either a Ethernet/IP network or Profibus field bus based network.

#### Advantages

- Provides operational and diagnostic data
  - Average motor current
  - Percentage of thermal capacity usage
  - Device status
  - Trip and warning identification
  - Trip history (five previous trips)
- Compact size
  - Direct mounting to the left side of the current sensing CEP7 -EE Overload Relay only adds 22mm to the width
- Simplifies control
  - Side-mount modules electronically interface with the CEP7 Overload Relay so that all control circuit connections are made at the Overload Relay terminals.
- Includes integrated I/O
  - 2 inputs
  - 1 output
- Expands protective functions
  - Overload warning
  - Jam protection
  - Underload warning

### KWIKSTARTER II

- Control motors up to 15HP @ 460V
- Pre-assembled or build from stock with CA7 contactors and your choice of overload relay
- Built for flexibility The enclosure will accommodate either the state-of-the-art solid-state or thermal overload relays
- Non-metallic enclosures are compact in size and made rugged for industrial application
- Designed for simplicity The START and STOP buttons mechanically interface with a special side mounted contactor auxiliary and N.C. OLR contact with **NO WIRING TO THE COVER.**
